LUCIFER LIGHTING WINS INTERNATIONAL ACCOLADES

SAN ANTONIO, TX SEPTEMBER, 2016 - Lucifer Lighting, a premier manufacturer of precision engineered architectural lighting fixtures, is proud to announce it was nominated by the German Design Council for the prestigious German Design Award, where Fraxion® received Special Mention. Lucifer Lighting has also recently received SSL's Product Innovation Award, Honorable Mention in The Architect's Newspaper's Best of Products Awards, and both Architectural Record's Advertising Excellence Award and Record Product Award.

Fraxion® offers the shallowest recess depths of any downlight in the industry, at just 2.13" for a fixed downlight and 3.2" for an adjustable, for both insulated and non-insulated ceilings. Available in round or square with a trimless install, or alternatively in two other flange profiles, Fraxion® utilizes a unique proprietary and field changeable optic system that integrates Reflection, Refraction and TIR principals for 100% control of the light. Adjustment is achieved with a hot-aim, utilizing a unique sliding pivot point with readable degrees of aim that optimizes center beam optics through the 40° adjustment cycle. US and overseas patent pending

Of these nominations, Ben Mathews, Vice President of Engineering at Lucifer Lighting, says, "Our family continually pushes product development to minimize designs as much as physically possible—it has become an obsession! It is something we think about day in and day out. Whether it is minimal flanges found on our trims or our shallow housings, evidence of attention to size is everywhere."

The German Design Award recognizes innovative products and projects, their producers and designers who are leading the way in international design. SSL's **Product Innovation Awards** selects the most innovative LED and solid-state luminaries in the design field. The Architect's Newspaper's **Best of Products Awards** honor outstanding products in eight different categories. Architectural Record's Annual **Advertising Excellence Awards** competition identifies the most effective ads in the market. Architectural Record's **Record Products** competition determines the best new Products of the year.

About Lucifer Lighting Company

For more than 35 years, Lucifer Lighting has created precision-engineered lighting solutions with a focus on leading-edge technology and aesthetic appeal. With product manufactured at its headquarters in San Antonio, Lucifer Lighting are favored by architects and designers worldwide, choosing from downlights, light strips, track and spot lights, and landscape lighting. Luminaires may be found in five-star hotels, distinguished institutions and cultural venues, retailers, luxury residences, corporate headquarters and more.
