LUCIFER LIGHTING's LFI BOOTH 2918 FEATURS INNOVATIVE DISPLAY
Renowned abstract artist Britt Bass Turner paints live during show

SAN ANTONIO, TX June 2014. — On the cusp of an ever-changing market, Lucifer Lighting is thrilled to deliver its 2014 LightFair booth, one of the latest displays of the company's creativity. Visitors can watch Brittany Bass Turner, a celebrated abstract artist from Atlanta, paint live, evaluating how different LED sources will illuminate her work. The booth showcases new products like the Cylinder Family, New Warm-Dim LED, and many more.

Visitors to the booth can swap through scenes alternating between three different Xicato sources within our new DL62ZP 45° adjustable downlights that illuminate the canvases as Britt paints, comparing color rendering properties of the Artist, Vibrant, and standard 82 CRI modules. After reflecting on the differences in how the choice in lighting CRI and spectral power distribution can wholly change what we see, visitors can give us their business card to take part in a raffle to win the paintings created during the show.

About Lucifer Lighting Company

For 35 years, Lucifer Lighting has created precision engineered, original lighting solutions with a focus on leading edge technology and aesthetic appeal. Made in the USA, Lucifer Lighting fixtures and systems are favored by architects and designers worldwide, The company is regularly recognized for distinction, and its robust, appealing fixtures are found in installations for five star hotels, distinguished institutions and cultural venues, high end retailers, luxury residences, corporate headquarters and more.
