**LUCIFER LIGHTING INTRODUCES EXCLUSIVE HIGH CRI WARM DIM**  
*Developed in partnership with Lumenetix*

SAN ANTONIO, TX. MAY 2014 — Lucifer Lighting Company will release at LFI 2014 a one of a kind warm dim LED profile specifically developed to mimic the incandescent dimming curve. Created in partnership with Lumenetix, this unique dimming profile exclusive to Lucifer Lighting was engineered after countless comparisons of various MR-16 dimming curves and rounds of designer feedback. Available in downlights from 2" apertures to 4.5" apertures, this impressive warm dim maintains Ra > 90 and R9 > 80 down to 1% lm output, going from 3000k at full brightness, warming to 1800k at complete dim, while maintaining 2SDCM color consistency.

**About Lucifer Lighting Company**

For 35 years, Lucifer Lighting has created precision engineered, original lighting solutions with a focus on leading edge technology and aesthetic appeal. Made in the USA, Lucifer Lighting fixtures and systems are favored by architects and designers worldwide, The company is regularly recognized for distinction, and its robust, appealing fixtures are found in installations for five star hotels, distinguished institutions and cultural venues, high end retailers, luxury residences, corporate headquarters and more. Installations of Lucifer Lighting may be found in diverse venues ranging from Goldman Sachs in New York to the Penguins' Stadium in Pittsburg, from Polo Ralph Lauren in Istanbul to Louis Vuitton Shanghai, from the Armani Restaurant at the Burj Khalifa in Dubai to all the celebrity chef restaurants in Singapore's Marina Bay Sands, from Las Vegas City Center to the Abu Dhabi Financial Center, from Windsor Castle to the White house, not to mention countless private residences.
